Chairman Words

We strongly believe that our motto of education is perpetual crusade against stagnation and imperfection. The institutions of higher learning are not mere information shops; they are places where a student's intellect, will and emotions are disciplined. Engineering education opens a vast plethora of scientific information before us, the study of which builds a student's intellect as well as character. We strive to make it all possible with a body of determined spirits fired by an unquenchable faith in their mission. Our institution has lived up to this vision and has made significant contribution in these areas during past 15 years of its existence with enduring efforts of all members of Takshshila family. With the indomitable efforts of our Training and Placement team, we were able to grab excellent offers for our students in National and Multi National Companies. Finally, I extend my whole hearted welcome to the students of the upcoming batch and assure them an everlasting and memorable association with the Takshshila family.

Year of Estd. : July 2004
Status : Self financed
Sponsored by : RNK Educational Society
Chairman : Mr. S.C. Masuraha

Introduction

Takshshila Group of Institutions is a self financing institution approved by AICTE, New Delhi. It is affiliated to Rajiv Gandhi Proudhyogiki Vishwavidyalaya, Bhopal (M.P.) for B.Tech., Polytechnic Diploma and M.Tech. programs. For MBA course it is affiliated to Rani Durgawati Vishwavidyalaya, Jabalpur. The institute laid its foundation in 2004 and is managed by RNK Educational Society. The beautiful campus is well known for its surroundings embraced by rocky hills and natural beauty. It is situated in the proximity of the famous eroded volcanic rock formations, very well known as Santulit Shila (Balancing Rock).

Our Vision

The vision of the society is to have a world class technical and management institute, where trained professionals are made who can meet the corporate/global challenges and who will prove to be winners in their respective careers.

Our Mission

- To provide quality education, with ample opportunities for overall personality development.
- To attract motivated faculty, with an aptitude for teaching learning process, with innovative methods of delivery.
- To inculcate the sense of punctuality, self discipline, integrity, human values and ethics in professional life.
- To enhance the competencies of staff on a continuous basis.
- To enrich the relevance of technical education to changing needs of the society.
- To promote teamwork and strength of character.
- To continuously develop competent human resources to match global standards.
- To produce not only good professionals, but also good human beings.

Industrial Engineering & Management
The programme focuses on the creation and transformation of technology-based business, which is examined from three complementary perspectives: strategy, operations and people.

Digital Communication
The program covers the field of information communication through various channels like wire, optical fibre and wireless channels. It also deals with information storage and retrieval from various media. It involves digital signal processing and communication.

Energy Technology
Through this programme we aim to fulfill the need for high caliber technical manpower in the growing energy and environment sectors.

Computer Science & Engineering
The programme emphasizes on developing strong learning skills and imparts knowledge in key subject areas relevant to current scenario in the field of computer science and engineering. It focuses on practical implementation of the ideas by means of research oriented projects.

MBA

Takshshila Polytechnic College (II shift) is one of the leading polytechnics in Jabalpur. Takshshila College was established in 2004 and thereafter began offering diploma courses from 2013. The college has been the vanguard of continuous development in technical education since its inception. The growth of the institution has been sustained by the technological support from international community. The institution is very well placed to plan, organize and implement effective programs for students and other target groups.

Civil Engineering : This course is broad based and is designed to introduce the students to a wide range of problems encountered by Civil Engineers in the field. A large number of subjects are offered to enable a student to study the area of his special interest in depth. Students are given practical problems of different areas as their projects. Survey camps and practical training are a part of the curriculum.

Mechanical Engineering : The course aims at providing basic knowledge in Mechanical Engineering in areas like Mechanics, Strength of Materials and Thermodynamics etc. The programme also includes subjects in areas of Design Engineering, Computer Programming and Numerical Analysis and CAD/CAM.

Electrical & Electronics Engineering : This course has been developed to provide a sound foundation in Electrical & Electronics Engineering. The main areas covered in the curriculum are Electrical Circuits, Electrical Measurement, Transmission and Distribution, Electrical Machines, Electrical Engineering Materials, Digital Electronic Circuits and Devices, Digital Systems, Electromagnetic Field Theory, Microprocessors and Interfacing.

Helpline Number : 7987930715

Polytechnic Diploma

The Department strives to provide Quality Management Education. It has its core body of knowledge, aesthetics, research instincts, distinct methods, aptitude and attitude of professionalism. For those endowed with inquisitive minds and drive to success, this course is a voyage of discovery leading to professionally satisfying career.

Training & Placement Cell

Prof. Garima Arora Bhatti
Training & Placement Officer

The goal of Training & Placement Cell is to provide world class training to students of Takshshila so that they can achieve opportunities available in the market.

We believe in "Training the students to get placement rather than placing the students to get training."

The Cell is well equipped with ample infrastructure in terms of Testing Halls, Consultancy Hall for Pre Placement Talk, Presentations, 10 Mbps lease line etc.

Campus Placement in Takshshila is excellent as the students are well prepared to fit into the demands of the job market. It has been achieving record High Percent placements since 2008, when the first batch of Engineering students graduated. Takshshila has always been a much favored talent-hunting ground for corporate world as it delivers industry-ready students. Multiple steps are taken to make graduates productive from day one. We had tie-ups with world leaders such as IBM, Oracle, Microsoft, SAP, Accenture etc. Second is the continuous stream of corporate honchos visiting Takshshila campus in several conclaves, conferences, workshops & seminars. Third is the well-structured corporate-based campus preparedness initiative under the Department of 'Career Advisory & Augmentation Services' (CAAS), which primarily encompass competency assessment and improvement activity including behavioral aspects of the students. Fourth is the professional training to globally certify students in various IT & non-IT skills in association with industry leaders like Microsoft, Oracle, IBM etc under Takshshila 'Certification'. Further, these efforts get strengthened by the niche activities of Takshshila 'Industry Engagement Cell' (IEC) which helps maintain a symbiotic relationship with industry to recognize their current market needs.

Mrs. Deepali Tiwari
Principal

Hard work, sincere effort, genuine approach and directional team work can make impossible possible. In the beginning of our successful fourth academic session I really feel proud to welcome you all to Mount Litera Zee School, Jabalpur. This is an endeavor to let you know our purpose and intent. MLZS, Jabalpur is a temple of a learning, where little ones are moulded into virtuous human beings. Despite the fact that now days primary and secondary level education is at crossroad, it leaves a baffling question before pass outs, what to do next, which pressurizes the students constantly. However, we in our school earnestly work to remove this pressure by making students self reliant and capable to take decisions.

We believe inclusive and child centered education for which the teachers are well trained and equipped to impart a different teaching pedagogy. We provide our students different outlets for channelization of their energy and to keep their interests intact engage them in various clubs and other co-curricular activities such as performing arts, yoga, sports and other programmes like Green School Programme, Amnesty International and Integrated School Awards which not only open the gate of challenges, creativity and core value learning but also foster curiosity, critical thinking and innovation in them.
